SUMMARY

Motivated Information Technology Engineering student interested in frontend development and modern web technologies. Skilled in creating responsive, user-friendly interfaces with a strong understanding of UI/UX principles. Adaptable, responsible, and eager to gain professional experience while contributing to real-world technology projects.

PROJECTS EXPERIENCE

Cambodia University Review — Frontend Development Project

Developed a university review website that provides information about universities in Cambodia and helps prospective students make informed decisions. Designed pages for university listings, university details, website information, and contact features.

Key Features:

- University listings with logos, names, locations, and founding years
- University details and review information
- User-friendly navigation and homepage
- About page explaining the platform's purpose
- Contact page for user inquiries

Technologies: HTML, CSS, JavaScript, PHP, MySQL

Library Management System — Java & MySQL

Developed a library management system to improve inventory management and simplify daily library operations.

Key Features:

- Book management: Add, search, edit, and manage books
- Patron registration and management
- Book issue and return tracking
- Stock and inventory management
- Supplier information management
- Low-stock alerts
- Login and dashboard system

Technologies: Java Swing, MySQL
